FOX NEWS POLL

For release at 6P ET, Friday, January 18, 2013

Methodology

The Fox News Poll is conducted under the joint direction of Anderson Robbins Research (D) and Shaw & Company Research (R). The poll was conducted by telephone with live interviewers January 15-17, 2013, among a random national sample of 1008 registered voters (RV).

Results are of registered voters, unless otherwise noted.

Landline and cell phone telephone numbers were randomly selected for inclusion in the survey using a probability proportionate to size method, which means that phone numbers for each state are proportional to the number of voters in each state.

Results based on the full sample have a margin of sampling error of ± 3 percentage points.

Results from Fox News polls before February 2011 were conducted by Opinion Dynamics Corp.
